RESEARCH ARTICLES	Working Papers <p>[1] “Investing with Purpose: Evidence from Private Foundations” with Matteo Binfarè We study the asset allocation, spending behavior, fees, and investment performance of U.S. private foundations. We find that large foundations generate positive risk-adjusted returns of about one percent per year. Larger and more sophisticated foundations perform better and invest more aggressively. Foundations with concentrated stock holdings have higher returns, but also take on more risk. Because of the constraints imposed by the five percent minimum spending rule and accommodating monetary policy, private foundations increase their risk-taking and reach for yield. Due to these constraints, a conservative asset allocation will decrease real wealth over time resulting in less charitable giving. Reject and Resubmit at the Journal of Finance</p> <p><i>Presentations:</i> 2024 ASSA[‡], University of Florida, 2022 Eastern Finance Association (EFA), 2022 Financial Management Association (FMA), 2021 American Finance Association (AFA) Ph.D. Student Poster, 2021 Southern Finance Association[†], 2021 Financial Markets and Corporate Governance (Virtual)[†], Ryerson University (Virtual)[†], Korea University Business School (Virtual)[†], University of Missouri</p> <p>[2] Does Innovation Decline Post-IPO? Solo-Authored Bernstein (2015) estimates that innovation quality decreases by 43 percent more post-IPO for firms that successfully go public to firms that file to go public but ultimately withdrawal. I</p>	

document that 54 percent of this magnitude is attributable to a negative survivorship bias from sample selection. In addition, I find no effect when extending his results to 2012, partially attributable to the decline in relevance of his identification strategy. I document an increase in trademark production for firms with completed IPOs which suggests public firms shift their innovative focus towards commercialization. These results cast doubt on the adverse effects of going public on innovation and the recent IPO literature that instruments for IPO completion using the post-filing returns on the Nasdaq stock index.
