ACADEMIC POSITIONS

- 2025– **Assistant Professor of Finance**
University of Arkansas, Sam M. Walton College of Business
- 2025– **Research Consultant**
Federal Reserve Bank of Chicago

EDUCATION

- 2025 **University of Missouri**, Ph.D. in Finance
- 2023 **University of Missouri**, M.A. in Economics, Quantitative Economics
- 2020 **University of Missouri**, B.S. in Business Administration (Finance); B.S. in Economics; B.S. in Statistics

RESEARCH INTERESTS

Alternative Investments • Household Finance • Public Finance

PUBLICATIONS

1. **Investing with Purpose: Evidence from Private Foundations**, with Matteo Binfarè
Journal of Finance, forthcoming, 2025.

WORKING PAPERS

1. **Immigration and Local Government Finances** (with Jess Cornaggia, Kim Cornaggia, and Ryan Israelsen)
Immigration lowers municipal borrowing costs and improves local fiscal capacity. Using a Bartik design based on historical settlement patterns and U.S. Census data dating to 1880, the paper links immigrant inflows to stronger local labor markets, revenues, and operating margins.
 - Semifinalist, Best Paper Award (Corporate Finance), Financial Management Association, 2025
2. **Does Fund Size Affect Private Equity Performance? Evidence from Donations to Private Universities** (with Abhishek Bhardwaj, Abhinav Gupta, and Sabrina Howell)
Increases in private equity fund size lower fund returns on an absolute and risk-adjusted basis. Using exposure to donations of private university endowments as an instrument for private equity fund size, the paper finds decreasing returns to scale driven by larger funds undertaking larger deals that subsequently underperform.
3. **Diversifying Labor Income Risk: Evidence from Income Pooling**
Labor income risk can be diversified effectively when contracts are well-designed to mitigate adverse selection and moral hazard. Using novel data on professional baseball players, this paper finds individuals contracting with teammates where monitoring is present limits moral hazard.
4. **Does Innovation Decline Post-IPO?**
Reassessing prior evidence, this paper shows that much of the estimated post-IPO decline in innovation reflects

survivorship bias and documents a shift toward commercialization after going public.

NON-REFEREED PUBLICATIONS

5. **The Role of Debt in Financing Higher Education**, with Matteo Binfarè
NBER Conference Volume: Financing Higher Education, 2025.
